

NCOA SUBMISSION Loris Erik Kent Hemlof 2013 26 november.

Welfare: payment of welfare to asset poor including while working and earning income (rather than just loafers including very rich) by assets test tightening so benefits are zero when total assets (including dwelling) reach \$100,000, so as to allow relaxation of disability and unemployment requirement that has existed and punished work. Family super levy of 20% on all income including benefits for access as income support to bring income up to 1% per month of family super savings (rather than blown at retirement on a year long mega party or cruise). Privatisation of ABC and SBS and 3% levy on income for payers choice of private media company. Replace public education with 1% levy on business revenue for payers choice of teacher/media company and 1000 channels satellite education (for recipients receiving most corporate sponsorship) 10% levy on business revenue for apprentices: absolute right to apprenticeship with equal pay for 80% of apprentice hours. Health vouchers: \$25,000 private health vouchers at birth, and \$1,000 extra vouchers per year (over allocation because of saving). Per voter payment to political parties each to run own catastrophic health event care health system. Tax on currency exodus (to tax havens and to buy imports). 20% tax on consumption including foreign currencies (only Australian made products exempt).
